

First screen will show SCM & SCO icon to select.

When click SCO button, it will be navigated to LOG ON screen.

After user logged on, Dashbord screen will be loaded. This screen will show Ship Location by realtime(15 mins/time) along with Realtime Weather Condition.

When user click Tracking >> Live Location : This screen will combine all Ship Location, Realtime CCTV, Crew Status and Fuel Oil Monitoring

SC NATA ▾

CCTV OPEN CCTV STOP CREW STATUS FMS

CCTV

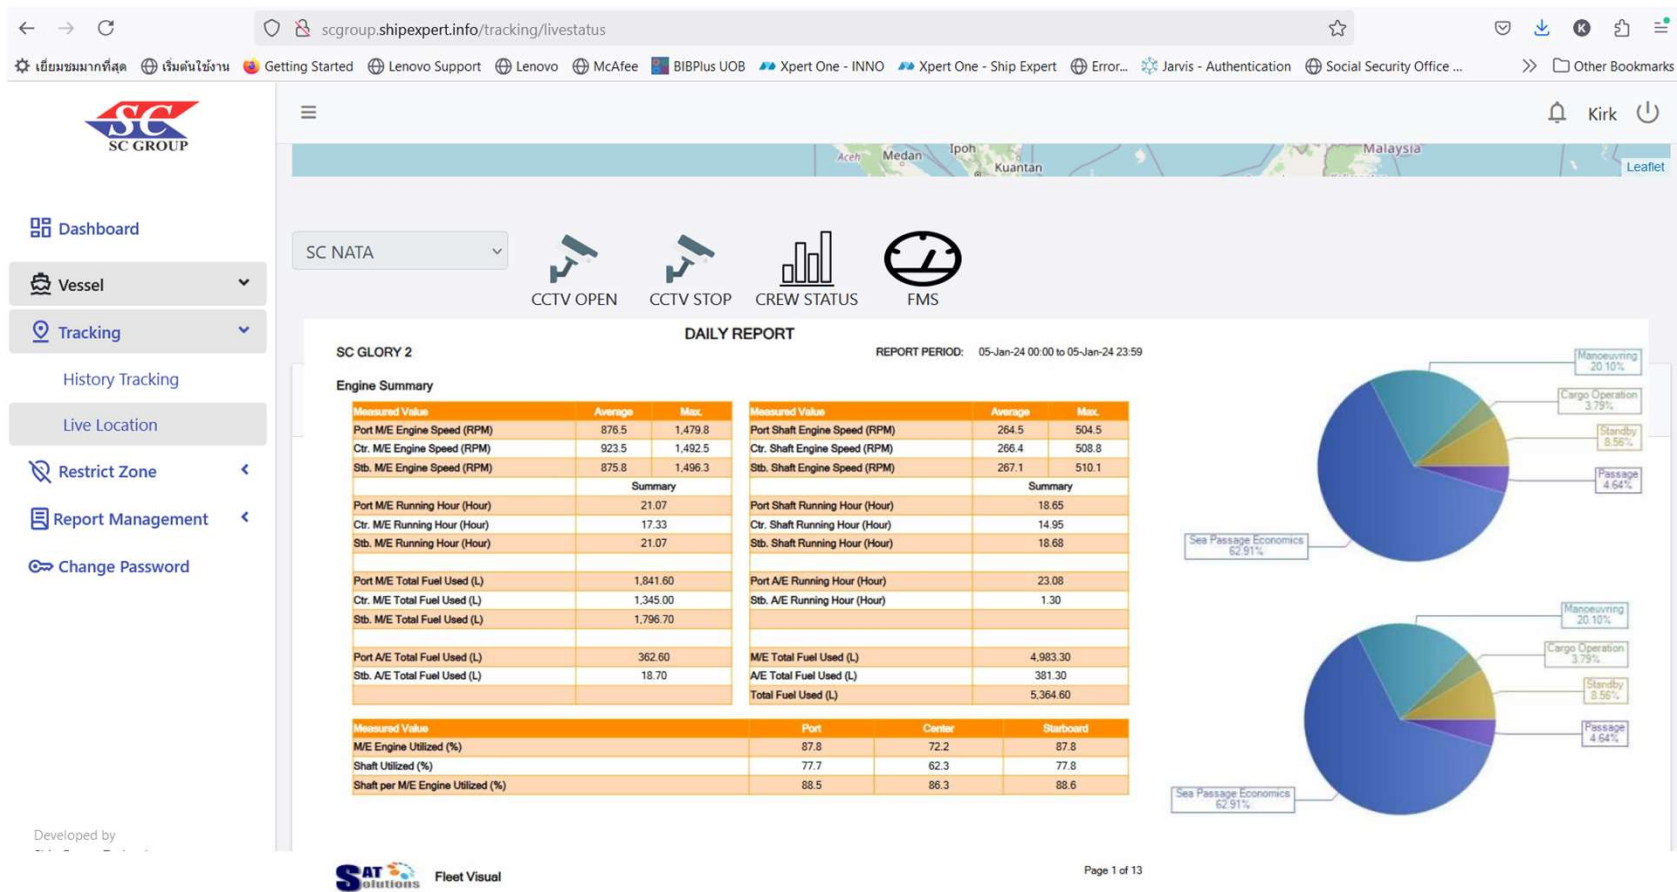

20-03-2025 Thu 14:21:06 NATA 01

20-03-2025 Thu 14:21:00 NATA 02

20-03-2025 Thu 14:21:07 NATA 03

20-03-2025 Thu 14:20:58 NATA 04

When user scroll down, user will find 4 icons which would show CCTV, CREW STATUS and FMS please.

When user click FMS will show FUEL OIL STATUS REPORT as above.

Problem & Issue remaining

- **CREW STATUS** : At present still don't have report to show or API to connect.
- **Fuel Oil Monitoring** : No API to connect with SC Portal, at present team has upload the report which submit to PTT to load instead.
